

**2015 Great American Canal Cleanup  
Burnt Store Isles Boat Club (BSIBC)**

Summary: Burnt Store Isles Canals are divided into five "garbological zones". This year two additional zones concentrating on the mangroves were added to make seven zones. Total weight collected was 113 lb which is an 8% increase from 2014. We always find styrofoam , wood sections, and plastic bottles. This year we also retrieved fish bait, a baseball, and one shoe.

The garbologists wish to thank our BSI residents and contractors for their diligence in preventing undesirable stuff from landing in the canals.

Location: Burnt Store Isles, Punta Gorda, Florida. Mangroves (perimeter canal), canals, and seawalls.

Miles of Cleanup: 22

Boats: 6

Total Weight Collected: 113 pounds

Volunteers: 16

Jean-Guy Allen  
Paul Bankson
